Advance Directives:

An "Advance Directive" is a general term that refers to your instructions about your medical care in the event you become unable to voice these instructions yourself. Each state regulates advance directives differently. STATE laws regarding Advanced Directives are found in Texas Health and Safety Code §166.-001-048. In the state of Texas, a patient has a right to an advance directive which will communicate their wishes about medical treatment at some time in the future when they are unable to make their wishes known because of illness or injury. In addition to this advance directive, Texas law provides for two other types of directives: the Medical Power of Attorney; and the Out-Of-Hospital Do Not Resuscitate Order. You have the right to informed decision making regarding your care, including information regarding Advance Directives and this facility's policy on Advance Directives. Applicable state forms will also be provided upon request. A member of our staff will be discussing Advance Directives with the patient (and/or patient's representative or surrogate) prior to the procedure being performed.

Complaints/Grievances: If you have a problem or complaint, please speak to one of our staff to address your concern. If necessary, your problem will be advanced to center management for resolution. You have the right to have your verbal or written grievances investigated and to receive written notification of actions taken.
